“Wynn Hypercar Exhibition, One-Click AI Creation Guide”

Copy the text below to receive the AI Prompt

Use the person in the original image as the ONLY character reference. Strictly preserve the original person's face shape, facial feature proportions, hairstyle, hair color, skin tone, expression, age appearance, head-to-body ratio, and overall temperament. The person must remain the exact same individual from the original image. Do not generate a different person, perform face swapping, alter facial features, over-beautify, reshape the face, modify the hairstyle structure, or change the person's gender or age.

Female outfit: Red-and-black color-block racing-style leather jacket with stand collar and zipper, simple white inner top, high-waisted black pleated mini skirt, and black platform knee-high leather boots. Overall style: cool racing-girl fashion.

Male outfit: Black, red and white color-block racing jacket with stand collar and zipper. Shoulders and collar are black, middle section is a solid red horizontal panel, lower section is white, with red stripe details on the sleeves. Match with black sports pants featuring red-and-white side stripes. Overall style is relaxed motorsport-inspired fashion. Colors, prints, logos and panel details must strictly follow the reference photo without modifying style or colors.

Preserve the original background environment. Remove any barriers or fences if present. Only modify the person and the car. Do not create a new person. Keep the original face, hair, upper body structure and visible clothing structure unchanged. While keeping the original face and upper-body identity unchanged, position the subject sitting steadily on the center of the hood of the same hypercar shown in the original image. Hips rest near the front section of the hood, legs naturally extended and tilted to one side, one elbow resting lightly on the hood and the other hand relaxed beside the body. Upper body slightly turned toward the camera while maintaining direct eye contact. Relaxed and natural pose with a low-saturation, stylish hypercar editorial look.

Use consistent warm indoor lighting. Ensure natural integration of lighting and shadows between the person and vehicle. Shallow depth of field, slightly blurred background, realistic photography quality, authentic skin texture, clean premium composition, no unnecessary objects.

[MANDATORY FACE LOCK REQUIREMENTS] Use the uploaded person as the ONLY facial reference. Lock 100% of all facial characteristics from the original image with zero modifications. Completely preserve face contour, jawline, cheekbone structure, facial proportions, eye shape, eye spacing, eyelids, pupil size, eyebrows, nose shape, nostrils, lip shape, lip thickness and philtrum length. No face reshaping, beautification, skin smoothing, facial reconstruction, face swapping, stranger generation, facial distortion or age modification. Preserve original skin tone, skin texture and facial expression exactly. Face similarity weight 100. Face preservation and identity accuracy must always take priority over image beautification.

[HYPERCAR AND ENVIRONMENT REQUIREMENTS] Wide-angle indoor exhibition hall photography. Camera pulled back to fully display the entire vehicle. Front, rear and all wheels must be completely visible without cropping. Preserve the original exhibition hall environment, storefronts and display windows. Remove all ropes and barriers. No visitors or unnecessary objects. Use the exact same hypercar from the original image with doors open. Realistic paint finish, natural reflections, warm indoor hotel spotlight lighting, soft realistic shadows and highlights, evenly illuminated vehicle. Slightly blurred exhibition background, shallow depth of field, 8K ultra-high-resolution, professional commercial event photography, realistic camera quality, authentic material textures, luxury hypercar exhibition atmosphere. Leave sufficient space in the composition for future poster design with black gradient borders at the top and bottom.

[BORDER DESIGN REQUIREMENTS] Vertical promotional poster. Top and bottom sections use pure matte black backgrounds. Top section contains bold red centered title text. First line: 「2026 永利臻典夢幻超跑展」. Second line: 「HYPERCAR EXHIBITION」. All text must be red, centered, and strictly follow the layout, wording and colors of the reference design. No gold text and no duplicate text. Bottom section contains centered white event information: 「2026 年 9 月 23 日至 11 月 22 日」,「SEPTEMBER 23 - NOVEMBER 22, 2026」,「永利皇宮 · 永利澳門」,「WYNN PALACE · WYNN MACAU」. The main image should softly blend into the black background through smooth gradients. No hard-cut borders. Premium commercial exhibition campaign quality, luxury hotel poster style, 8K resolution, harmonious colors, clean composition.

[FINAL GENERATION REQUIREMENTS] Strictly follow all instructions above. Image ratio 4:5. All Chinese text displayed in the image must be Traditional Chinese. Do not add any extra AI-generated creative elements beyond those specified. Final image must have premium commercial exhibition campaign quality, luxury hotel poster style, 8K ultra-high-definition resolution and harmonious color grading.
